

Steering a course to safety.

THE SPECIALISTS IN
THE MARINE INDUSTRY

Safety on board.

For almost 120 years, Dräger has been synonymous with safety and quality right across the globe. Constant improvements to processes, products and services will maintain this good reputation in the future.

Wherever people or assets are subject to danger, those who are responsible for their safety rely on respiratory and personal protective equipment as well as gas measurement solutions from Dräger. Here at Dräger we have always recognised our responsibility as a supplier of safety systems and will continue to do everything we can to meet the needs of our customers, and keep Dräger users safe.

Every product in our comprehensive portfolio is manufactured in accordance with Dräger's demanding quality criteria. We know and understand the special requirements that relate to safety equipment on board sea vessels, and we take these into account. Easy handling, rapid deployment and high reliability are essential, as is a value for money. Quality is also important, particularly when it comes to personal protection and the measurement of hazardous substances. Used around the world, Dräger products are known for their quality and functionality in these demanding environments.

Safety on board is a daily concern for shipping companies and their crew, as well as ship's chandlers and shipping agents. The first priority is to

avoid accidents at high sea, to protect the lives of the crew and passengers, and to prevent environmental disasters and damage to either the vessel or the cargo. Products that are used to protect and save lives and minimise damage must function 100 percent.

Dräger offers a complete portfolio of fire, rescue and safety equipment, including service and maintenance. In addition, faulty equipment can be repaired in our Marine Service Centers where safety defects can be remedied, and if necessary, equipment can be replaced. Designed to bring you peace of mind, this service is available on all products, it does not matter whether they are from Dräger or another manufacturer. What matters most is that you receive a complete service from a single source, simplifying the documentation, the organisational requirements and, of course, the invoicing.

Dräger stands for the highest possible safety standards – whether on sea, on inland waterways or in harbours.

Dräger. Technology for Life.

Dräger gas measurement technology.

When it comes to measuring hazardous substances, Dräger offers everything from classic DrägerTubes® through to portable gas measurement equipment. Convenient and easy to use, they allow oxygen, toxic gases and explosive mixtures to be measured with fast, reliable precision. Amongst other applications, they also allow Confined Space Entry measurements to be taken before entering tanks and enable process monitoring to be carried out in cargo holds with inert gas atmospheres.

Dräger has the ideal solution whether it be for personal protection in hazardous areas or the transportation of dangerous goods.

GAS DETECTION PUMP AND DRÄGER TUBES®

DrägerTubes® are the embodiment of short-term measurement systems – and for good reason. As the market leader for more than seventy years, Dräger has perfected the “laboratory behind the glass”. The proof of our customers’ satisfaction lies in the fact that more than 100 million DrägerTubes have been sold in the last 10 years alone.

ST-6732-2006

DRÄGER accuro®

- Robust gas detection pump for short-term measurements
- Ideal for use in difficult or inaccessible locations
- Easy, single-handed operation
- Clear and easily visible stroke end indication

ST-1963-2004

DRÄGER TUBES®

See BG tube kit:

- Dräger tubes® for nitrous gases 0.5/a
- Dräger tubes® for oxygen
- Dräger tubes® for Polytest
- Dräger tubes® for CO₂
- Dräger tubes® for CO
- More than 350 other Dräger tubes® are available to detect more than 500 substances

FUMIGATION KIT

ST-1694-2003

DRÄGER FUMIGATION KIT

- Handy set designed to check for fumigants in containers and loading areas.
- Simultan Test Fumigation
- Simultan Test Container
- Identifies fumigants without the need to open the container, even where labels are incorrect or missing.
- Uses DrägerTubes to measure the concentration levels of the most common fumigants: ammonia 5/a, hydrocyanic acid 2/a, nitrochloroform 0.1/a, ethylenoxide 1/a, formaldehyde 0,2/a, carbon dioxide 0.1%/a, carbon monoxide 10/d, methyle bromide 0.2/a, hydrogen phosphite 0.1/a, sulphuryl chloride 1/a

SINGLE GAS INSTRUMENTS

Innovative in design, the Dräger Pac 3000, Dräger Pac 5000 and Dräger Pac 7000 single gas measurement instruments combine compact size and reliability with tremendous robustness. Providing the crew with immediate warning of a gas hazard, the range features visual as well as audible and vibrational alarms.

ST-5022-2004

DRÄGER PAC 3000 (O₂, CO or H₂S)

- Small and robust (impact-proof housing with rubber protection, resistant to corrosive chemicals)
- Protection against electromagnetic interference
- Large status display
- Gas inlet at the top and front (minimises the risk of inadvertently covering the gas inlet)
- Triple warnings with acoustic, optical and vibrational alarms
- Service life: 2 years

Dimensions (W x H x D)	64 x 84 x 20mm (battery compartment: 25mm)
Weight	106 g
Ingress protection	IP 65

ST-5015-2005

DRÄGER PAC 5000 (O₂, CO or H₂S)

- Protection against electromagnetic interference
- Concentration display – continuous indication of the gas concentration in large digits
- Gas inlet at the top and front (minimises the risk of inadvertently covering the gas inlet)
- Triple warnings with acoustic, optical and vibrational alarms
- Event Logger
- Service life: 2 years

Dimensions (W x H x D)	64 x 84 x 20mm (battery compartment: 25mm)
Weight	106 g
Ingress protection	IP 65

ST-1506-2007

DRÄGER PAC 7000 (O₂, CO, H₂S or CO₂ and other special gases)

- Small and robust (impact-proof housing with rubber protection, resistant to corrosive chemicals)
- Protection against electromagnetic interference
- Concentration display – continuous indication of the gas concentration in large digits
- Gas inlet at the top and front (minimises the risk of inadvertently covering the gas inlet)
- Triple warnings with acoustic, optical and vibrational alarms
- Unlimited instrument life
- Data and event logger
- MED approval

Dimensions (W x H x D)	64 x 84 x 20mm (battery compartment: 25mm)
Weight	106 g
Ingress protection	IP 65

MULTI GAS INSTRUMENTS

Be on the safe side with Dräger multi gas measurement instruments. Whether you choose the flexibility of a multi-purpose model or an all-encompassing solution with integral pump, you can be sure of durable, comprehensive protection.

ST-7461-2005

DRÄGER X-AM 2000 (EX, O₂, CO, H₂S)

- Measurement instrument for 1 to 4 gases
- Also offers high sensitivity to flammable organic vapors
- Protected against dust and water, rubber protection resists impact and vibration, insensitive to electromagnetic radiation
- Gas inlet at the top and front (minimises the risk of inadvertently covering the gas inlet)
- Triple warnings with acoustic, optical and vibrational alarms
- Long-life electro-chemical sensors (innovative technology of the highest level)
- External pump and flexible hose for hard to reach applications (tank or confined space entry, pits, etc)
- MED approval

Dimensions (H x W x D)	47 x 129 x 31 mm
Weight	approx. 220 g
Ingress protection	instrument and sensor block IP 67

ST-9468-2007

DRÄGER X-AM 5000 (EX, O₂, CO, H₂S, CO₂ AND VARIOUS OTHER GASES)

- Measurement instrument for 1 to 5 gases
- Ergonomic, mobile phone format
- Flexible sensor installation (retrofit, conversion or setup for other gases)
- Protected against water and dust, rubber protection resists impacts and Vibration, insensitive to electromagnetic radiation
- External pump and flexible hose for hard to reach applications such as tank or confined space entry, pits, etc.,
- Gas inlet at the top and front (minimises the risk of inadvertently covering the gas inlet)
- Triple warnings with acoustic, optical and vibrational alarms
- Long-life electro-chemical sensors (innovative technology of the highest level)
- MED approval

Dimensions (W x H x D)	47 x 129 x 31 mm
Weight	approx. 220 g
Ingress protection	instrument and sensor block IP 67

ST-9477-2007

PUMP FOR DRÄGER X-AM 2000 AND DRÄGER X-AM 5000

- Simple to use
- Ideal for entry measurements and/or monitoring of confined spaces and tanks, etc
- Starts automatically and initiates a controlled flow test
- Fast and easy change-over between pump and diffusion operation
- Integrated dust and water filter protects the pump and sensors against contamination
- Easy filter replacement without tools

ST-131-2004

**DRÄGER X-AM 7000**

- Ideal for monitoring the hydrocarbon and oxygen content in inert atmospheres (with IR-Ex sensor 0-100 vol % HC and 02-LS 0-25 vol %)
- Measurement instrument for 1 to 5 gases with integral pump
- Flexible adaptation to 37 selectable gases
- Intuitive software functions
- Protected against splash water and dust, can also be submerged or dropped from a height of 1.5 meters without damage,
- Large graphic display provides information at a glance
- Triple warnings with acoustic, optical and vibrational alarms
- Various sensors available for detecting special gases, e.g.: IR Ex, IR CO₂, Cat Ex sensor, PID/XS R CO
- Long-life electro-chemical sensors (innovative technology of the highest level)
- MED approval

Dimensions (H x W x D)	140 x 150 x 75 mm
Weight	basic instrument approx. 600 g battery approx. 490 g (3.0 Ah), 730 g (6.0 Ah)
Ingress protection	IP 67

ST-1959-2005

**DRÄGER SENSORS FOR****DRÄGER X-AM 7000**

- IR sensors: Ex, CO₂, CO₂ HC
- Cat-Ex sensor
- Cat-Ex sensor HC
- PID sensor
- XS R sensors: CO, H₂S, O₂
- XS EC sensors: CO, H₂S 100, H₂S HC, O₂ LS, O₂ 100, NO, SO₂, NO₂, COCl₂, NH₃, HCN, Cl₂, Hydride, CO₂, OV, OV-A, Odorant, PH₃ HC, Amine, CO HC, H₂
- XS 2 sensors: CO, H₂S, O₂

DRÄGER X-AM 5000

- CatEx 125
- XXS-sensors: O₂, CO, H₂S, NO₂, SO₂, PH₃, HCN, NH₃, CO₂, Cl₂, OV, OV-A, H₂S LC, CO/H₂S

DRÄGER X-AM 2000

- CatEx 125
- XXS-sensors: Ex, O₂, CO, H₂S

ST-2592-2004

**STANDARD ALARM THRESHOLDS:**

- O ₂	A1: 19,0 Vol.-%	A2: 23,0 Vol.-%
- H ₂ S	A1: 10 ppm	A2: 20 ppm
- CO	A1: 30 ppm	A2: 60 ppm
- CAT	A1: 20 % LEL	A2: 40 % LEL
- CO ₂	A1: 0,5 Vol.-%	A2: 1,0 Vol.-%

ALCOHOL AND DRUG MEASUREMENT INSTRUMENTS

Alcohol and drugs can also be hazardous to safety on board. Whether in the engine room, handling cargo, working on quayside or in the galley, everyone is entitled to a safe place of work. With the right instruments, the use of alcohol and drugs can be detected and the risks can be reduced.

ST-198-2004

DRÄGER ALCOTEST 6510

- Manual measurement instrument for fast, precise breath-alcohol analysis.
- Microprocessor-controlled sampling
- Full text indication on the graphic display, 3 LED colors
- Result is indicated in different measurement unitseigt
- Short reaction times, even at high alcohol concentrations
- GL certified
- Meets the requirements of the US Coast Guard

Measuring principle	electro-chemical Dräger sensor in 1/4" technology; alcohol-specific
Measuring range	0 to 2.5 mg/L; Display indication if the measurement range limit is exceeded
Sampling	standard: automatic sampling when the minimum volume has been reached Passive sampling or manual triggering of sampling possible
Dimensions (W x H x D)	140 mm x 72 mm x 32 mm,
Weight	approx. 195 g, incl. batteries
CE mark	Directive 89/336/EEC (electromagnetic compatibility)

ST-1327-2007

DRÄGER DRUGTEST 5000

- Detects 6 different substance categories (opiates, cocaine, cannabinoides, amphetamines, benzodiazepine designer drugs and tranquillisers)
- Easy, stress-free, hygienic sampling of oral fluid
- Result within 10 minutes
- Manipulation of the result is almost impossible
- Stores the number, progression and results of up to 500 tests

Operating voltage	12 V DC (11 to 15 V DC)
Dimensions (W x H x D)	200 mm x 250 mm x 220 mm,
Weight	4.5 kg

This brochure contains a small selection of Dräger gas measurement technology. For detailed information and additional articles visit the Dräger website: www.draeger.com.

ST-6914/2006

Dräger DrugCheck™

- Oral fluid sampling with very high sensitivity
- Simultaneous, qualitative detection of up to six categories of illegal drugs
- Can be used any time, anywhere and by anyone
- Minimally invasive sampling
- Hygienic, individually packaged sample collectors
- Immediate evaluation of the samples in situ
- If necessary, the oral fluid sample can be secured in the test tube, stored and sent to a lab for analysis and result confirmation

Dräger DrugCheck™ limit value concentration (cut-off)

	Drug	ng/ml
COC	cocaine	20
OPI	opiate	40
AMP	d-amphetamine	50
MET	d-methamphetamine	50
PCP	phencyclidine	10
THC	☉ tetrahydrocannabinol	50

Personal protection products from Dräger – because there is nothing more valuable than pure air.

A crisis at sea means that people's lives are likely to be at risk. Quickly and effectively, Dräger products can help you to counter fires or deal with accidents involving dangerous goods. With our personal protective equipment, for instance, you can protect your crew from danger, help them to escape from contaminated or smoke filled areas, or rescue and evacuate other personnel. Whatever the crisis, Dräger is there with a helping hand – even in the most extreme situations.

ST-6284-2006

ST-5899-2007

ST-11207-2008

COMPRESSED AIR BREATHING APPARATUS

Independent from the ambient air, compressed air breathing apparatus provides the wearer with breathing air that is unaffected by the surrounding atmosphere. Designed to protect against air that is contaminated with hazardous substances, it also protects the user from oxygen depletion.

ST-6107-2007

DRÄGER PAS MARINE

- Compressed air breathing apparatus for fire fighting
- Ergonomically designed backplate, strong and robust, electrically conductive, resistant to high temperatures and chemicals
- Easily adjusted cylinder strap – designed as 1 cylinder apparatus
- Integral Lung Demand Valve
- SOLAS approval
- MED approval

ST-2453-2003

DRÄGER COMPRESSED AIR CYLINDERS

- 6L compressed air cylinder with an operating pressure of 200 or 300 bar
- Various other cylinder types available
- Suitable for the DRÄGER PAS MARINE

CHEMICAL PROTECTION SUITS

Working with hazardous substances or handling dangerous chemicals can often seriously endanger human life and health. The nature and design of suitable protective clothing is determined, amongst other things, by the physical condition of the chemical. For example, gas-tight chemical protection clothing not only protects against solids and liquids, but also gaseous hazardous substances. Dependent on the respiratory protection equipment used, Dräger can offer a number of different designs.

ST-5883-2004

DRÄGER WORKMASTER PRO ET

- Single-piece chemical protective suit made of Himex®, protects against chemicals in any physical condition
- Permanently integrated full-face mask or face cuff
- Worn with external respiratory protection device
- Resistant to darting flames
- Protective gloves and safety boots are chemical-resistant and robust
- Protective gloves are easy to replace
- Equipment meets EN 943-1:2002, type 1b and EN 943-2:2002
- SOLAS approval
- MED approval

ST-720-2008

DRÄGER SPC 3800

- Single-piece protective suit made from Tychem®, with socks and splash cover for boots
- Dräger face cuff can be worn under or on top of the mask
- Zipper positioned at the back protects against leaks in particular and permits easy donning and doffing
- Butyl gloves offer special hand protection
- Available in four sizes (M to XXL)
- SOLAS approval

ESCAPE SETS

In emergencies you need equipment that actively and reliably supports the rescue of individuals. In particular, emergency situations and work in extreme environmental conditions call for escape sets that are easy to use. Where breathing is difficult or in danger, Dräger understands the problem and offers a solution.

ST-6138-2007

DRÄGER SAVER CF

- Compressed air escape set with automatic activation
- 15 min. air supply
- Easy and fast to don, hood provides constant respiratory air flow
- Secure neck sealing
- Residual pressure warning near the end of the air supply
- SOLAS approval
- MED approval

ST-470-2003

DRÄGER PARAT C

- Fire escape hood with single-point straps
- Increases the chances of survival during a fire
- Min. 15 minutes protection against fumes, vapors and smoke
- Protects the eyes and respiratory tracts

ST-3474-2003

ST-3475-2003

DRÄGER OXY K 30 HS and HW

- Head, face and eye protection against smoke and heat
- Easy donning and breathing
- Verbal communication possible due to inner mask
- Suitable for wearers of glasses
- Immediate oxygen supply via quick starter
- Stored equipment is free from maintenance and service for 10 years
- Immediate detection of readiness via the service indicator
- Dräger OXY K 30 HW: fast deployment, device is removed from the wall and opened simultaneously
- CE approval in accordance with DIN 58639 and SOLAS
- MED approval

DRÄGER BREATHING GAS MANAGEMENT SYSTEMS

Tailored to meet user requirements during design, production and assembly, Dräger respiratory air supply systems range from compressors offering 100-400 litres per minute via oxygen booster pumps to complete breathing gas management systems.

ST-771-2004

DRÄGER JUNIOR 100

- Reliable and robust with a very low weight
- Simple operation with easily understood pictograms
- Extremely robust and durable compressor block
- Fan wheel cover made from special break-proof, UV-resistant plastic ensures optimum cooling
- All moving parts such as drive belts, pulleys and fan wheels are optimally protected

ST-772-2004

DRÄGER CAPITANO 140

- Extremely durable engine, designed for both short term and constant operation
- Long service life guaranteed by three-stage construction and the use of industrial rolling bearings
- Maintenance-free, low pressure oil pump
- Vibration-reducing construction
- TRIPLEX® filter system in accordance with the strict respiratory air standard DIN EN 12021

ST-7001-2008

DRÄGER AEROTEST SERIES

- Monitoring of the breathing air quality in accordance with DIN EN 12021 is performed by means of a quantitative measurement (of contamination) in the compressed air flow
- Based on proven DrägerTube® technology, hazardous substances such as carbon monoxide or dioxide, water vapor or oil can be detected in the compressed air outflow
- Fast, simple operation
- Ready for use and supplied in a convenient case

This brochure presents just a small selection of Dräger personal protection products. Further information and the complete product range can be found at www.draeger.com.

Total Care Service – safety comes first.

Where safety is concerned Dräger, with its new Total Care concept, is a reliable partner. Providing a fast service during short berthing times, Dräger offers uncomplicated, efficient maintenance, repair and replacement of all your fire, rescue and safety (FRS) equipment.

Dräger Marine Service Centers are at your disposal in the ports of Rotterdam, Hamburg, Singapore and Constanta. In addition, because Dräger is a globally active service provider, the Dräger network is able to provide support everywhere for products as well as our range of services.

Meeting your every day need, Dräger offers a comprehensive service, irrespective of whether the equipment is from Dräger or another manufacturer. This might include: compressed air breathing apparatus maintenance, fire extinguisher service, testing of stationary fire extinguishing systems, checking escape sets, the test and calibration of gas measurement instruments, hydrostatic tests for air cylinders, and complete safety equipment inspection to ensure operational readiness.

Highly qualified, experienced technicians ensure the usual high quality Dräger standards, whilst making sure that all your needs are met and simplified by using a single source.

TOTAL CARE IS AVAILABLE FROM DRÄGER MARINE SERVICE CENTERS

- **Around the clock:** service and product availability 365 days a year, 24 hours a day
- **All-round:** Maintenance, inspection, repair of all FRS equipment – whether portable or stationary, or a Dräger or third party product
- **Fast:** immediate service, inspection and repair during berthing
- **Comfortable:** Pick-up and delivery service
- **Flexible:** replacement equipment if necessary (replacement programme/fleet stock)
- **Simple:** one contract partner, one contact for all your FRS equipment
- **Reliable:** 90 days warranty on all work
- **Transparent:** one invoice, detailed documentation
- **Certified:** Quality in accordance with international standards and those of ship classification companies; ISO 9001 certificate

Other services, based on your specific needs and requirements, are also possible.

Fire

Maintenance, inspection, repair and, if necessary, replacement of all mobile and permanent fire extinguishing and warning systems.

Portable fire extinguishers

- Annual inspection of portable and movable fire extinguishers of any type (dry powder/CO₂/foam/water)
- Extended inspection after 5 and 10 years
- Hydrostatic pressure vessel testing
- Refilling – any extinguisher type

Stationary fire extinguishing systems

- Annual inspection of CO₂/halon/DP/ water and foam extinguishing systems
- Extended inspection after 5 and 10 years
- Hydrostatic pressure vessel testing
- Refilling – any extinguishing systems
- Foam analysis

Firefighting hoses/couplings

- Inspection – firefighting hoses, couplings and water hydrants
- Pressure test - firefighting hoses
- Repair - firefighting hoses

Fire detectors

- Inspection and repair of fire detectors on board
- Certification of fire detectors of any kind

Rescue

Maintenance, inspection, repair and, if necessary, replacement of the following emergency and rescue equipment:

Life rafts

Life boats and davits

- Annual inspection, irrespective of manufacturer
- Co-operation with recognised test stations

Life vests

Immersion suits

- Annual inspection

Emergency ventilators

- Annual inspection of portable and stationary ventilators
- In-house oxygen recharging station
- Hydrostatic pressure vessel testing

Safety

Maintenance, inspection, repair and, if necessary, replacement of the following safety equipment – irrespective of manufacturer:

Compressed air breathing apparatus

Compressed air hose equipment

Compressed air cylinders

ESCAPE SETS

Masks

- Fully automatic computer-aided test equipment for the annual inspection of equipment
- Filling of compressed air containers
- Hydrostatic pressure vessel testing

Respiratory air compressors

- Service and "overhaul" workshop
- Spare part inventory for Bauer respiratory air compressors
- Respiratory air quality check in accordance with EN 12021

CHEMICAL PROTECTION SUITS

- Annual leak test
- Repair and replacement

Measurement instruments

- Portable and stationary gas measurement technology (Ex/Ox/Tox)
- Breath-alcohol measurement instruments
- Gas detection pumps

Dräger – always a safe harbour.

The maintenance, repair and replacement of any equipment is not the only thing that makes the Total Care Service special. You know what you need on board your ship and Total Care can help you to put together your own personal safety package from all the services on offer.

Organisation: If required, Dräger can monitor warranty periods and remind you when inspections are due. If you wish, we can even take over the management of all portable gas measurement instruments for your entire fleet.

Around the clock: No matter what time of day or night your ship enters the harbour – a Dräger Service technician will be waiting at the jetty. Equipped with all the necessary documentation, this service specialist will know where everything is and which repair, maintenance or replacement tasks have to be carried out. We know that speed is of the essence and our technicians arrive with everything that is needed, ready to start work straightaway.

Replacement equipment: Whenever one of your portable gas detection instruments requires mainten-

ance, we will arrange for a corresponding replacement device to be waiting for you at your next port of call. The instruments belong to either your shipping company or your ship and, as part of our service, Dräger automatically meets your needs with stock from your own pool of equipment.

Training: With targeted and regular training you will be better equipped to handle any emergency situation. Dräger can bring you up to speed with a host of training issues from operating measurement instruments through to firefighting on board.

Information: VOICE is a hazardous substance information system for personal protective equipment and measurement instruments. 365 days – 24h, on CD or at www.draeger.com/voice.

Certified: With every device maintained by the Dräger Marine Service Center, you not only feel safe, but you also receive the necessary inspection reports and certificates. Whether SOLAS, Maritime Equipment Directive (MED) or Port State Control – with products and services from Dräger you can show your commitment to safety.

Dräger keeps your ships ready for deployment.

As part of our Total Care Service, should any equipment prove to be beyond repair, it will be replaced as required – irrespective of whether it is included in the Dräger portfolio or not. We make sure that everything is in the right place, at the right time.

PORTABLE FIRE EXTINGUISHERS

The most divergent fire extinguishers and extinguishing agents, e.g.:

- powder
- CO₂
- foam

FIRE FIGHTING HOSES AND NOZZLES

- Fire fighting hoses from 1" to 3" in various lengths, in stock
- Large number of couplings, e.g. brass and light alloy couplings
- Various types of spray nozzles and monitors

IMMERSION SUITS

- Various types of survival and anti-exposure suits
- MED / NMD approval
- Safety lights

LIFE VESTS

- Various types
- MED approval
- Inherent buoyant vests
- Inflatable vests with single chamber
- Inflatable vests for offshore use (dual chamber system)
- Safety lights

LIFE RAFTS

- Various types of life rafts available
- Throw-over or davit launch
- Standard or self-righting
- Hydrostatic releases
- Life raft inventory

Steering the right course – to safety.

Customer trust is only gained by a continuous, quality performance. Since 1889 Dräger has gained and maintained this trust and, in so doing, has made a name for itself world-wide. Thanks to our own global network, Dräger is always on hand, ready to come to your aid quickly, wherever and whenever you need us.

A safe environment can easily be created with gas measurement technology and personal protective equipment from Dräger. With us, you can be sure that you have found a reliable partner who will combine speed with a quality service and, by using the comprehensive Dräger portfolio, you can be one hundred percent sure of the safety of your ship and your crew, both at land and at sea.

The Dräger Total Care concept guarantees your commitment to safety on board, even if budgets and time are becoming ever tighter. Dräger offers you the right solution for every requirement – whether you are interested in individual product solutions or want to hand over your complete safety sector to us.

Long after your ship has left port we will continue to work with you. Our aim is to be a reliable, long-term partner, taking care of your needs, keeping down costs and simplifying your processes.

For your next inspection, our four Marine Service Centers are at your disposal.
